

FIG. 1 is a block diagram of a television system. The system includes an antenna 100, a tuner 106, an analog television signal processor 112, a video signal processor 116, a display 120, a satellite receiver 108, an MPEG decoder 114, an audio signal processor 118, a processor 110, an on-screen display memory 128, a voice recognition system 126, and a remote control receiver 124. The antenna 100 is connected to the tuner 106. The tuner 106 is connected to the analog television signal processor 112. The analog television signal processor 112 is connected to the video signal processor 116. The video signal processor 116 is connected to the display 120. The satellite receiver 108 is connected to the MPEG decoder 114. The MPEG decoder 114 is connected to the analog television signal processor 112. The analog television signal processor 112 is also connected to the audio signal processor 118. The audio signal processor 118 is connected to the processor 110. The processor 110 is connected to the on-screen display memory 128, the voice recognition system 126, and the remote control receiver 124. The processor 110 is also connected to the video signal processor 116 and the audio signal processor 118. The processor 110 is connected to the display 120 via the video signal processor 116. The processor 110 is connected to the audio signal processor 118 via the audio signal processor 118. The processor 110 is connected to the on-screen display memory 128 via the on-screen display memory 128. The processor 110 is connected to the voice recognition system 126 via the voice recognition system 126. The processor 110 is connected to the remote control receiver 124 via the remote control receiver 124.
